

Multithreading

1 ThreadTest.java

```
public class ThreadTest {
    public static void main(String [] args) {
        new MeinThread("Anna").start();
        new MeinThread("Berta").start();
    }
}
```

2 MeinThread.java

```
public class MeinThread extends Thread {
    private String name;

    public MeinThread(String name) {
        this.name=name;
    }

    @Override
    public void run() {
        super.run();
        for(int i=0; i<1000; i++){
            System.out.println(name + ": " + i);
        }
    }
}
```
