

CSV-Dateien mit Python

Schreiben in CSV-Datei

```
import csv

with open('schueler.csv', 'w') as schueler_file:
    schueler_writer = csv.writer(schueler_file, delimiter=';')
    schueler_writer.writerow(['Annna', 'Arm', 25])
    schueler_writer.writerow(['Berta', 'Bein', 27])
    schueler_writer.writerow(['Carla', 'Copf', 39])
```

Lesen aus CSV-Datei

```
import csv

with open('schueler.csv') as schueler_file:
    schueler_reader = csv.reader(schueler_file, delimiter=';')
    for zeile in schueler_reader:
        vorname = zeile[0]
        nachname = zeile[1]
        alter = zeile[2]
        print('{} {}, {} Jahre'.format(vorname, nachname, alter))
```

schueler.csv

```
Annna;Arm;25
Berta;Bein;27
Carla;Copf;39
```
