

VBScript Zusammenfassung

Kommentar

```
' Kommentar
```

Variablendeklaration erzwingen

```
Option Explicit
```

Variablendeklaration

```
Dim i,n
Dim Feld(9)           ' Feld(0),... ,Feld(9)
```

Operatoren

```
Zuweisung:           =
arithmetisch:        +, -, *, /, \, ^, Mod
Vergleich:           =, <, >, <=, >=, <>
Concatenation:       &, +
Logisch:              And, Or, Not, Xor
```

Verzweigungen

```
If ... Then
    ...
ElseIf ... Then
    ...
Else
    ...
End If

Select Case ...
    Case ...
    ...
    Case ...
    ...
    Case Else
    ...
End Select
```

Schleifen

```
For i = 0 To 9 Step 1
    ...
Next

For Each ... In ...
    ...
Next

Do While ...
    ...
Loop

Do
    ...
Loop While ...
```

Prozeduren (ohne Rückgabewert)

Definition

```
Sub name (x, y)
    ...
End Sub
```

Aufruf

```
Call name (1, 2)
```

Funktionen (mit Rückgabewert)

Definition

```
Function name (x, y)
    ...
    name = ...
End Function
```

Aufruf

```
z = name (1, 2)
```
