

localStorage

Lesen von localStorage

```
if(localStorage.getItem('data')){
  const dataString = localStorage.getItem('data');
  dataArray = JSON.parse(dataString);
}else{
  dataArray = [];
}
```

Schreiben in localStorage

```
const dataString = JSON.stringify(dataArray);
localStorage.setItem('data', dataString);
```

SvelteKit: Überprüfen, ob der Code im Browser ausgeführt wird

```
import { browser } from "$app/environment";

if(browser){
  ...
}
```
