

Svelte: Parent to Child

Parent.svelte

```
<script>
  import Child from "./Child.svelte";
  let data = { vorname: "Anna", nachname: "Arm" };
</script>

<div>
  <Child person={data} />
</div>
```

Child.svelte

```
<script>
  export let person;
</script>

<div>
  {person.vorname} {person.nachname}
</div>
```
